ORGANIZATION

Vanderbilt University Medical Center ("VUMC") is a Tennessee not-for-profit corporation incorporated in March of 2015 to operate an academic medical center including a comprehensive research, teaching, and patient care health system (the "Medical Center"). Until April 29, 2016, the Medical Center operated as a unit within Vanderbilt University ("the University" or "VU"), as a part of the University's administrative structure, with the same governing board, legal, financial, and other shared services. VUMC began operations effective April 30, 2016, following the closing of the sale of the Medical Center by the University (the "Acquisition").

VUMC owns and operates three hospitals located on the main campus of the University in Nashville, Tennessee: Vanderbilt University Adult Hospital ("VUAH"), Monroe Carell Junior Children's Hospital at Vanderbilt ("MCJCHV"), and Vanderbilt Psychiatric Hospital ("VPH"). In addition, VUMC partially owns Vanderbilt Stallworth Rehabilitation Hospital ("VSRH"), also located on the main campus of the University, through a joint venture with Encompass Health Corp. (formerly called HealthSouth Corp.) in which VUMC holds a 50% interest, which includes a 1% interest held by Vanderbilt Health Services, LLC, ("VHS"), a VUMC wholly owned subsidiary. VUAH, MCJCHV, and VPH are licensed for 1,072 beds, and VSRH is licensed for 80 beds.

VUMC consists of two major operating divisions and an administrative overhead division. The operating divisions include the Clinical Enterprise and Academic Enterprise divisions. The administrative overhead division is referred to as Medical Center Administration ("MCA").

The Clinical Enterprise division includes the professional clinical practice revenues and related expenses of Vanderbilt Medical Group ("VMG"), and technical revenues and associated expenses for the operation of VUMC's hospitals and clinic facilities, including VUAH, MCJCHV, and VPH. The Clinical Enterprise also includes VHS.

- VUAH is a quaternary care teaching hospital licensed for 692 acute care and specialty beds.
 VUAH, a Level I trauma center, provides advanced patient care and serves as a key site for medical education and clinical research conducted by physician faculty.
 VUAH includes a comprehensive burn center, the Vanderbilt Transplant Center, the Vanderbilt Heart and Vascular Institute, and the Vanderbilt Ingram Cancer Center.
- MCJCHV is a pediatric quaternary care teaching hospital licensed for 142 acute and specialty beds, 50 pediatric intensive care beds, and 96 neonatal intensive care beds. MCJCHV is the region's only full-service pediatric hospital, with over 30 pediatric specialties. MCJCHV serves as a site for medical education and clinical research conducted by pediatric physician faculty, houses the only Level IV neonatal intensive care center and the only Level 1 pediatric trauma center within the region, and is a regional referral center for extracorporeal membrane oxygenation (heart and lung failure).
- VPH is a psychiatric hospital licensed for 92 beds and provides both inpatient and outpatient
 partial hospitalization psychiatric services to both adult and adolescent patients. Also, VPH
 provides psychiatric assessment services and neuromodulation procedures through
 electroconvulsive therapy and transcranial magnetic stimulation.
- VMG is the practice group of physicians and advanced practice nurses employed by VUMC, most of whom have faculty appointments from the University, who perform billable professional medical services. VMG is not a separate legal entity. VMG has a board which consists of the VUMC clinical service chiefs, who also serve as clinical department chairs. Under the oversight of VUMC executive leadership, VMG sets professional practice standards, bylaws, policies, and procedures. VUMC bills for services rendered by VMG

clinicians in both inpatient and outpatient locations. Collected fees derive a component of each VMG clinician's compensation. VMG includes nationally recognized physicians whose expertise spans the spectrum from primary care to the most specialized quaternary discipline. The entire clinical faculty is "board certified" or eligible for board certification. All staff members are re-credentialed every two years by the National Committee for Quality Assurance standards. All specialties and subspecialties currently recognized by the various national specialty boards are represented on the clinical faculty.

- VHS serves as a holding company for 16 health care related subsidiaries and joint ventures owned with various entities, including, but not limited to, VSRH and the Vanderbilt Health Affiliated Network ("VHAN"). VHS operations primarily consist of community physician practices, walk-in and retail health clinics, imaging services, outpatient surgery centers, radiation oncology centers, a home health care agency, a home infusion and respiratory service, an affiliated health network, accountable care organizations, and a rehabilitation hospital. These subsidiaries include clinics managed in multiple outpatient locations throughout middle Tennessee and southwestern Kentucky.
- VUMC also has a holding company that includes four limited liability subsidiaries which support various business to business activities in order to improve the quality, affordability and availability of health care services. These subsidiaries include businesses focused on pharmacy and supply chain.

The Academic Enterprise division includes all clinically-related research, research-support activities, and faculty endeavors supporting post-graduate training programs. A significant funding source for VUMC's research has historically been the federal government. Federal funding is received from the Department of Health and Human Services, the National Institutes of Health, the Department of Defense, NASA, and other federal agencies. Sponsored research awards, including multiple-year grants and contracts from government sources, foundations, associations, and corporations signify future research commitments. Also, core activities supporting research, including advanced computing and grant administration, are included in this division.

As mentioned above and throughout this document, VUMC acquired the Medical Center and its operations from the University in the Acquisition. For the purpose of funding the Acquisition and other capital projects, VUMC entered into certain debt agreements. Certain of these debt agreements contain required disclosures which outline annual and quarterly reporting requirements. In addition, certain of these debt agreements require notices of the occurrence of significant events which include but are not limited to delinquencies, bond calls, rating changes, bankruptcies, and mergers or acquisitions.

Certain amounts in the Fiscal 2018 financial statements and certain financial ratios have been reclassified to conform to their Fiscal 2019 presentation. Several of these changes are a result of recently issued accounting guidance.

The VUMC fiscal year end is June 30. The information contained in this document represents the unaudited consolidated results of operations of VUMC as of and for the twelve months ended June 30, 2019.

SUMMARY OF OPERATING AND UTILIZATION DATA

Licensed Beds

As of June 30, 2019, VUMC's facilities have 1,072 beds approved for operation, of which 1,058 were fully staffed, with 82 operating rooms. As of June 30, 2018, VUMC's facilities had 1,051 beds approved for operation and fully staffed, with 80 operating rooms. These beds are primarily located at VUAH, MCJCHV and VPH. A fourth hospital, VSRH, is operated within a separate joint venture entity, which is currently owned 50% by VUMC. Counting VSRH beds, managed beds at Williamson Medical Center Inpatient Children's Unit, and operated observation beds and bassinet beds, total beds as of June 30, 2019 and 2018, equates to 1,296 and 1,275, respectively.

VUMC Research Revenues

VUMC receives revenues from research grants which are both federally and non-federally sponsored. The Department of Health and Human Services, the National Institutes of Health, the Department of Defense, NASA, and other federal agencies supported over 75% of the research expenditures conducted by VUMC as of June 30, 2019 and 2018. The breakdown of direct research revenues is as follows for the twelve months ended June 30, 2019 and 2018 (\$ in thousands):

Source	FY 2019	FY 2018
Federal	\$ 297,758	\$ 288,535
Non-Federal	99,776	102,239
Total	\$ 397,534	\$ 390,774

Capital Cash Flows

Capital expenditures for the twelve months ended June 30, 2019 and 2018, were \$215 million and \$199 million, respectively. The FY 2019 period primarily includes construction of tangible assets and the FY 2018 period primarily includes software development and implementation costs, as well as the construction of tangible assets. The portion of our capital expenditures related to construction in progress for the two periods are largely related to the children's hospital expansion, as well as the adult bed expansion and clinic relocation.

Utilization

VUMC's overall functional occupancy rate was 93.8% and 94.2% during the twelve months ended June 30, 2019 and 2018, respectively, (functional occupancy rate calculated as inpatient days plus observation days in inpatient units divided by total licensed beds, less research, labor & delivery, and double rooms used as singles). The average number of inpatients in the hospital at midnight census was 969 and 911 at June 30, 2019 and 2018, respectively. Thus, VUMC has continued to operate at or above the theoretical optimal occupancy of 85% when total utilization of capacity is measured. Utilization statistics of the hospitals and clinics for the twelve months ended June 30, 2019 and 2018, are as follows:

	FY 2019	FY 2018
Licensed beds ⁽¹⁾	1,072	1,051

VUMC Inpatient Acuity

Across all inpatients, VUMC's inpatient acuity is measured by case mix index ("CMI"). VUMC's total CMI and CMI for Medicare patients for the twelve months ended June 30, 2019 and 2018, are presented below:

	FY 2019	FY 2018	
Total CMI ⁽¹⁾	2.14	2.16	
Medicare CMI ⁽¹⁾	2.34	2.37	

(1) Excludes normal newborns.

During the twelve months ended June 30, 2019 and 2018, ambulatory visits at the Medical Center totaled 2,117,101 and 2,021,617, respectively (excluding ambulatory visits from VHS joint ventures). While the majority of the VMG adult and children's ambulatory practice is located in VUAH on the main campus, VUMC health care services are offered outside the main campus, with approximately 49% and 48% of outpatient visits at off-campus locations during the twelve months ended June 30, 2019 and 2018, respectively.

VUMC Payor Mix

The Medical Center receives payment on behalf of most of its patients from a number of third parties, including Blue Cross and other private insurers, the federal government through Medicare, and the federal and state governments through Medicaid. TennCare, the State's managed care plan operating under a Section 1115 Medicaid demonstration waiver from the federal government, provides the majority of Medicaid revenues. The remaining Medicaid revenues are from Medicaid patients who live outside of the State. Blue Cross, one of VUMC's largest payors represented 20% and 19% of total gross patient service revenue (based on total gross patient service revenue, including professional fee revenue) for the twelve months ended June 30, 2019 and 2018, respectively.

The revenues attributable to Blue Cross are presented in the commercial/managed care category in the following table, which sets forth the sources of gross amounts of patient service revenue as well as gross amounts of patient service revenue net of contractual allowances for the twelve months ended June 30, 2019 and 2018:

	06/30/19	06/30/19
Payor Mix ⁽²⁾	Gross	Net
Commercial/Managed Care ⁽¹⁾	45.9%	61.7%
Medicare/Managed Medicare	32.6%	23.5%

Total	100.0%	100.0%

- (1) Commercial includes commercial indemnity and other patient service programs provided under contractual arrangements.
- (2) Percentages based on total net patient service revenue, including professional fee revenue.

VUMC's major commercial managed care contracts are multi-year agreements, typically three to four years with automatic annual escalators. Commercial contracts reimburse the facility on case rates with stop loss provisions for inpatient medical/surgical services and fee schedules for outpatient services. VPH is reimbursed on per diems. VUMC has no agreements based on full risk or capitation reimbursement. Three major commercial contracts utilize performance on quality metrics as a basis for a portion of the annual escalators. Over 74% of VUMC's payments for healthcare services are covered under contracted rates. Termination dates for the most material contracts are presented in the below table.

The following table details payments received from VUMC's largest commercial contracts as a percentage of total net patient revenue for the twelve months ended June 30, 2019 and 2018, as well as the respective contract renewal date.

Commercial Contract Payments as a Percentage of Total Net Patient Revenue

Medicare Advantage contracts represented approximately \$221 million and \$150 million in net revenue or 7.2% and 7.0% of Hospital and Clinic net revenue for the twelve months ended June 30, 2019 and 2018, respectively, and have renewal dates ranging from October 31, 2019 through July 31, 2021.

⁽²⁾ If not renegotiated by either party, contract renews indefinitely. Note: Does not include behavioral or dental service contracts.

SUMMARY OF FINANCIAL DATA

Cash and Investments

The VUMC Board of Directors (the "Board") approves the investment policy, while VUMC management is responsible for appointing and removing investment managers, monitoring asset allocation within the policy guidelines, and other ongoing oversight of the investment portfolio. VUMC utilizes external investment advisors to provide professional investment analysis and guidance to assist in evaluating the performance of the funds. As the risk profile of VUMC matures, VUMC management anticipates undertaking modest additional risk, through asset allocation adjustments, in order to improve long-term investment returns. The table below summarizes VUMC's investment allocation as of June 30, 2019, including working capital.

MANAGEMENT DISCUSSION AND ANALYSIS

Our FY19 results were significantly better than FY18, driven by increased operating revenue, primarily due to increased net patient service revenue. The increase in net patient service revenue was due to improved clinical volume and significant improvement in cash collections. In addition to growth in our top line, we have continued to focus on expense control improving our expenses as a percentage of revenue on a year over year basis. Our balance sheet metrics have improved on a year over year basis due to our improvement in excess of revenues over expenses and the continued focus on cash collections in the wake of our electronic medical record implementation. Due to the improvements in cash collections, our days cash on hand at year end was 99.6.

FY19 operating earnings before interest, depreciation and amortization (operating EBIDA) of \$344 million was \$124 million greater than FY18 operating EBIDA of \$220 million. The increase in operating EBIDA was driven by a \$411 million increase in operating revenue, partially offset by a \$287 million increase in operating expenses, excluding interest, depreciation and amortization. FY19 operating results of \$181 million was \$125 million greater than FY18 operating results of \$56 million. Excess of revenues over expenses was \$208 million which is \$110 million greater than FY18 excess of revenues over expenses of \$98 million. The increase is due to the increase in operating income mentioned above offset by a decrease of \$15 million in non-operating income.

The primary drivers of the \$15 million decrease in non-operating income was unfavorable mark to market adjustments of the interest rate exchange agreements' obligations, net of settlements, of \$24 million. The increase in the unfavorable mark to market adjustments of the interest rate exchange agreements obligation is due to unfavorable interest rate changes compared to the prior year. This is partially offset by an increase in investment income of \$6 million from \$30 million in FY19 compared to \$24 million in FY18.

Revenues

FY19 operating revenue increased approximately \$411 million, or 10%, to \$4,497 million, from \$4,086 million a year earlier. The primary driver of the increase in revenues was a \$378 million, or 11%, increase in net patient service revenue to \$3,821 million from \$3,443 million a year earlier. The remaining increase is driven by increases in academic and research revenue and other operating revenue of \$11 million and \$22 million, respectively.

Expenses

FY19 expense increased approximately \$286 million, or 7%, to \$4,316 million from \$4,030 million a year earlier. The primary drivers of this increase were increases in salaries, wages and benefits (\$111 million), drug costs (\$70 million), and medical supplies (\$37 million). The increase in these expenses is primarily due to increased staffing, drug and supply needs to meet additional demand associated with higher net patient service revenue and margin. Drug expense has increased primarily due to additional infusion volume, mostly in the outpatient setting, also driving net patient service revenue and margin. A primary driver of the unfavorable medical supply variance is an increase in lung, heart and kidney transplants when compared to prior year, also associated with higher net patient services revenue and margin.

Balance Sheet / Cash Flow

FY19 net assets increased by approximately \$245 million primarily due to excess of revenues over expenses, restricted contributions net of those released from restriction, additional endowments, including appreciation, and change in noncontrolling interest's net assets of approximately \$208 million, \$15 million, \$20 million and \$2 million, respectively. Cash and cash equivalents increased by approximately \$74 million. The increase in cash and cash equivalents of \$74 million was driven by EBIDA of \$344 million, partially offset by \$53 million of unrestricted investment purchases, net of sales and \$215 million for the construction of certain long-lived assets.

Conclusion

Our FY19 operating results reflect a return to strong operating performance as we completed our recovery after our electronic medical record implementation which occurred in FY18. We saw improved outpatient and surgical volumes as we refined our new system and improved throughput in our clinic operations. These increased clinical volumes drove improved net patient service revenue as we continued to tightly manage our variable and fixed costs, evidenced by the fact that expenses grew at a rate of 7% while revenue and net patient revenue grew at 10% and 11%, respectively. In addition to the improved operating performance, the balance sheet improved year over year. Accounts receivable is relatively flat compared to the prior period as we continue to lower our days sales outstanding while growing our net revenue per day, resulting in growth in cash and cash equivalents.
